1. User Requirement Specification.

URS-01: The registered users can log in to the system.

URS-02: The registered users can log out from the system.

URS-03: The users can view a main page.

URS-04: The users can view a temple's annual activity.

URS-05: The users can view a temple's other activity.

URS-06: The users can view a temple's history.

URS-07: The registered users can ask the dhamma question.

URS-08: The users can view the dhamma question and answer.

URS-09: The users can view the temple's photo gallery.

URS-10: The users can view the temple's video.

URS-11: The users can view the temple's map.

URS-12: The users can view a contact us page.

URS-13: The users can access the temple's Facebook page.

URS-14: The users can register to be a registered user.

URS-15: The administrator users can update temple's history.

URS-16: The administrator users can update the temple's news.

URS-17: The administrator users can add the temple's news.

URS-18: The administrator users can delete the temple's news.

URS-19: The administrator users can update the temple's annual activity.

URS-20: The administrator users can add the temple's annual activity.

URS-21: The administrator users can delete the temple's annual activity.

URS-22: The administrator users can update the temple's other activity.

URS-23: The administrator users can add the temple's other activity.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	2/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

URS-24: The administrator users can delete the temple's other activity.

URS-25: The administrator users can update the temple's photo gallery.

URS-26: The administrator users can add the temple's photo gallery.

URS-27: The administrator users can delete the temple's photo gallery.

URS-28: The administrator users can add a photo in the gallery of the temple's photo gallery.

URS-29: The administrator users can delete a photo in the gallery of the temple's photo gallery.

URS-30: The administrator users can add a video on the temple's video gallery.

URS-31: The administrator users can delete a video on the temple's video gallery.

URS-32: The administrator users can update temple's dhamma lesson.

URS-33: The administrator users can add temple's dhamma lesson.

URS-34: The administrator users can delete temple's dhamma lesson.

URS-35: The administrator users can approve the user's dhamma question.

URS-36: The administrator users can answer the user's dhamma question.

URS-37: The administrator users can edit the answer of the user's dhamma question.

URS-38: The administrator users can delete the user's dhamma question.

URS-39: The registered users can update their user profile.

URS-40: The registered users can view their dhamma question history.

URS-41: The users can view the temple's new page.

URS-42: The users can view the photo in a gallery in the temple's photo gallery.

URS-43: The registered users can leave a message for the temple.

URS-44: The users can view a dhamma lesson.

2. User Requirement Specification with the Software Requirement Specification

URS-01: The registered users can log in to the system.

SRS-6: The system shall provide the user interface to show the login status (e.g. label with the link of a username of each user or label with "Login" and "Register" link).

SRS-1: The system shall provide a login page for users.

SRS-2: The system shall provide an input interface (e.g. text box) for users to input the username and password.

SRS-3: The system shall authenticate username and password of users with the database.

SRS-104: The system shall provide a control (e.g. button) for registered users to submit the username and password.

SRS-4: The system shall provide the main page for users.

SRS-5: The system shall provide the user interface to show the error message: "Incorrect Username & Password. Please try again.".

URS-02: The registered users can log out from the system.

SRS-7: The system shall provide a control (e.g. button, label with link) for users to choose.

SRS-6: The system shall provide the user interface to show the login status (e.g. label with the link of a username of each user or label with "Login" and "Register" link).

SRS-4: The system shall provide the main page for users.

URS-03: The users can view a main page.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-4: The system shall provide the main page for users.

URS-04: The users can view a temple's annual activity.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	4/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

SRS-8: The system shall provide a control (e.g. activity menu) for users to choose the type of temple's activity.

SRS-97: The system shall retrieve the annual activity information from the database.

SRS-9: The system shall provide the annual activity page for users.

URS-05: The users can view a temple's other activity.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-8: The system shall provide a control (e.g. activity menu) for users to choose the type of temple's activity.

SRS-95: The system shall retrieve the other activity information from the database.

SRS-10: The system shall provide the other activity page for users.

URS-06: The users can view a temple's history.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-98: The system shall retrieve the temple's history from the database.

SRS-11: The system shall provide the temple's history page for users.

URS-07: The registered users can ask the dhamma question.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-12: The system shall provide question and answer dhamma page for users.

SRS-106: The system shall provide a control (e.g. button) for users to choose to ask a dhamma question.

SRS-13: The system shall provide an input interface (e.g. textbox) for users to input their question.

SRS-14: The system shall provide a control (e.g.button) for users to submit their question.

SRS-105: The system shall record the dhamma question into the database.

SRS-69: The system shall provide notification to administrator users for the incoming question via email.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	5/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

URS-08: The users can view the dhamma question and answer.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-12: The system shall provide question and answer dhamma page for users.

SRS-107: The system shall retrieve the dhamma question which already answered from the database.

SRS-108: The system shall provide a control (e.g. link with a topic name) for users to choose to view a dhamma question and it answered.

SRS-15: The system shall provide a user interface (e.g. text area) for the users to view the dhamma answer.

URS-09: The users can view the temple's photo gallery.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-99: The system shall retrieve the temple's photo gallery list from the database.

SRS-16: The system shall provide a photo gallery page for users.

URS-10: The users can view the temple's video.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-100: The system shall retrieve the temple's video list from the database.

SRS-17: The system shall provide a video gallery page for users.

SRS-103: The system shall provide the user interface for users to show the video of the temple.

URS-11: The users can view the temple's map.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-18: The system shall provide the contact us page for users.

SRS-19: The system shall provide an interface (e.g. google map API) for users to show the temple location on the map interface.

URS-12: The users can view a contact us page.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	6/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

SRS-18: The system shall provide the contact us page for users.

URS-13: The users can access the temple's Facebook page.

SRS-19: The system shall provide a control (e.g. Facebook icon) for users to choose.

SRS-20: The system shall provide the temple's Facebook page to users.

URS-14: The users can register to be a registered user.

SRS-6: The system shall provide the user interface to show the login status (e.g. label with the link of a username of each user or label with "Login" and "Register" link).

SRS-21: The system shall provide the register page to users.

SRS-22: The system shall provide an input interface (e.g. textbox) for users to input their information to register to the system.

SRS-23: The system shall provide a control (e.g. button) for users to submit their information.

SRS-24: The system shall validate the user's information.

SRS-94: The system shall record the user's information into database.

SRS-25: The system shall provide an interface to show the completion message ("Register Successful") to users.

SRS-26: The system shall provide an interface to show the error message ("Register Unsuccessful, Please try again!") to users.

URS-15: The administrator users can update temple's history.

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-114: The system shall retrieve the temple's history from the database.

SRS-11: The system shall provide the temple's history page for users.

SRS-27: The system shall provide a control (e.g. edit link) for administrator users to choose for edit the temple's history.

SRS-28: The system shall provide an input (e.g. text area) with the current temple's history information for administrator users to edit.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	7/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

SRS-29: The system shall provide a control (e.g. button) for administrator users to submit the new information.

SRS-115: The system shall record the new temple's history to the database.

SRS-30: The system shall provide an interface to show the completion message ("Update Successful") to users.

SRS-31: The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users.

URS-16: The administrator users can update the temple's news.

SRS-7: The system shall provide a control (e.g. menu bar) for administrator users to choose.

SRS-32: The system shall provide the temple's news page for administrator users.

SRS-33: The system shall provide a control (e.g. manage link) for administrator users to choose.

SRS-34: The system shall provide a news management page for administrator users.

SRS-116: The system shall retrieve a temple's news from the database.

SRS-35: The system shall provide a control (e.g. add, update, delete link) for administrator users to choose.

SRS-36: The system shall provide an input interface (e.g. text area) with the current temple's news information for administrator users to edit.

SRS-29: The system shall provide a control (e.g. button) for administrator users to submit the new information.

SRS-117: The system shall record a temple's news to the database.

SRS-30: The system shall provide an interface to show the completion message ("Update Successful") to users.

SRS-31: The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users.

SRS-63: The system shall provide an update message to registered users via email.

URS-17: The administrator users can add the temple's news.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	8/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

SRS-7: The system shall provide a control (e.g. menu bar) for administrator users to choose.

SRS-32: The system shall provide the temple's news page for administrator users.

SRS-33: The system shall provide a control (e.g. manage link) for administrator users to choose.

SRS-34: The system shall provide a news management page for administrator users.

SRS-116: The system shall retrieve a temple's news from the database.

SRS-35: The system shall provide a control (e.g. add, update, delete link) for administrator users to choose.

SRS-37: The system shall provide an input interface (e.g. text area) for administrator users to add the news of the temple.

SRS-29: The system shall provide a control (e.g. button) for administrator users to submit the new information.

SRS-117: The system shall record a temple's news to the database.

SRS-30: The system shall provide an interface to show the completion message ("Update Successful") to users.

SRS-31: The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users.

SRS-63: The system shall provide an update message to registered users via email.

URS-18: The administrator users can delete the temple's news.

SRS-7: The system shall provide a control (e.g. menu bar) for administrator users to choose.

SRS-32: The system shall provide the temple's news page for administrator users.

SRS-33: The system shall provide a control (e.g. manage link) for administrator users to choose.

SRS-34: The system shall provide a news management page for administrator users.

SRS-116: The system shall retrieve a temple's news from the database.

SRS-35: The system shall provide a control (e.g. add, update, delete link) for administrator users to choose.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	9/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

SRS-38: The system shall ask for the confirmation of administrator users to delete the news information.

SRS-117: The system shall record a temple's news to the database.

SRS-30: The system shall provide an interface to show the completion message ("Update Successful") to users.

SRS-31: The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users.

URS-19: The administrator users can update the temple's annual activity.

SRS-7: The system shall provide a control (e.g. menu bar) for administrator users to choose.

SRS-8: The system shall provide a control (e.g. activity menu) for users to choose the type of temple's activity.

SRS-39: The system shall provide the temple's annual page for administrator users.

SRS-33: The system shall provide a control (e.g. manage link) for administrator users to choose.

SRS-97: The system shall retrieve the annual activity information from the database.

SRS-40: The system shall provide an annual activity management page for administrator users.

SRS-35: The system shall provide a control (e.g. add, update, delete link) for administrator users to choose.

SRS-41: The system shall provide an input interface (e.g. text area) with the current temple's annual activity information for administrator users to edit.

SRS-29: The system shall provide a control (e.g. button) for administrator users to submit the new information.

SRS-118: The system shall record the temple's annual activity to the database.

SRS-30: The system shall provide an interface to show the completion message ("Update Successful") to users.

SRS-31: The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	10/165

3.2.7 View a temple's video

Use Case ID:	UC-07
Use Case Name:	View the temple's video.
Developed By:	Sb2store Group.
Date:	17-04-2015
Super Use Case:	None
Actor(s):	Users.
Brief Description:	Users can view the temple's video about the temple in the temple's website.
Trigger:	Users choose to view the temple's video in the temple's website.
Pre-conditions:	Users are on the temple's website.
Post-conditions:	Users view the temple's video about the temple in the temple's website.
Flow of Events:	<ol style="list-style-type: none"> 1. The system shall provide a control (e.g. menu bar) for users to choose. 2. Users click "Video" button. 3. The system shall retrieve the temple's video list from the database. 4. The system shall provide a video gallery page for users. 5. The system shall provide the user interface for users to show the video of the temple. 6. Use case ends.
Alternative Flows and Exceptions:	None
Priority:	Normal
Non-Behavioral Requirements:	None
Assumptions:	None
Note and Issues:	None

URS-10: The users can view the temple's video.

Introduction: The users can view a temple's video gallery by click "Video" button on the website's menu bar.

Input: None

Precondition: None

Action: Activity Diagram (AD-07)

Figure 10: Activity Diagram (AD-07) view the temple's video

Output: The system provides the video gallery page to users.

System Requirement Specification

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-100: The system shall retrieve the temple's video list from the database.

SRS-17: The system shall provide a video gallery page for users.

SRS-103: The system shall provide the user interface for users to show the video of the temple.

Introduction: The users can view the dhamma question and answer by click each topic name on Dhamma Q/A page.

Input: None

Precondition: None.

Action: Activity Diagram (AD-17)

Figure 20 Activity Diagram (AD-17) view the dhamma answer

Output: The system provides the question and answered on each topic name that the users were click.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	66/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

System Requirement Specification

SRS-7: The system shall provide a control (e.g. menu bar) for users to choose.

SRS-12: The system shall provide question and answer dhamma page for users.

SRS-107: The system shall retrieve the dhamma question which already answered from the database.

SRS-108: The system shall provide a control (e.g. link with a topic name) for users to choose to view a dhamma question and it answered.

SRS-15: The system shall provide a user interface (e.g. text area) for the users to view the dhamma answer.

3.2.18 Update their user profile

Use Case ID:	UC-18
Use Case Name:	Update their user profile.
Developed By:	Sb2store Group.
Date:	17-04-2015
Super Use Case:	None
Actor(s):	Registered users.
Brief Description:	Registered users can update their current user profile in the temple's website.
Trigger:	Registered users choose to update their current user profile in the temple's website.
Pre-conditions:	Registered users are on the temple's website. Registered users are already logged-in in the system.
Post-conditions:	Registered users updated they user profile in the temple's website.
Flow of Events:	<ol style="list-style-type: none">1. The system shall provide a control (e.g. button, label with link) for users to choose.2. Registered users click link with their username.

Document Name	1.Requirement Part.docx	Owner	Sb2store Group	Page	67/165
Document Type	Requirement Specification	Release Date	21 April 2015	Print Date	23 April 2015

	<ol style="list-style-type: none"> The system shall provide my profile page for registered users. The system shall provide a control (e.g. button) for registered users to edit their profile. Registered users click "Edit profile" button. The system shall retrieve a user's profile information from the database. The system shall provide an input interface (e.g. text box) with exist user's profile information for registered users to edit. Registered users input a new information. The system shall provide a control (e.g. button) for registered user to submit the new information. Registered user click "Submit" button. The system shall validate a new user's profile information. The system shall record a new user's profile information from the database. The system shall provide an interface to show the completion message ("Update Successful") to users. Use case ends.
Alternative Flows and Exceptions:	<p>In the step 11 of Flow of Events, the validation of user's profile is not passed.</p> <ol style="list-style-type: none"> The system shall highlight the failed input part of user's information with a red font. Return to the step 8 of Flow of Events. <p>In the step 12 of Flow of Events, if the system cannot record the user's information into database.</p> <ol style="list-style-type: none"> The system shall provide an interface to show the error message ("Update Unsuccessful, Please try again!") to users. Use case ends.
Priority:	Normal
Non-Behavioral Requirements:	None
Assumptions:	1. Registered users know how to input the information on the input interface.
Note and Issues:	None

URS-39: The registered users can update their user profile.

Introduction: The registered users can update their user profile by click edit profile link on my profile page. The system will provide an input with a current personal information to user for edit.

Input:

Input	Example	Note
Username	szkies	- length : 1 – 40 characters - type : alphabet or number
Password	first0824966816	- length : 1 – 40 characters - type : alphabet or number
Name	Suriya	- length : 1 – 40 characters - type : alphabet
Surname	Sasujit	- length : 1 – 40 characters - type : alphabet
Address	124/65 T.nongprkarang Muang Chiang Mai	- length : 1 – 100 characters - type : alphabet or number
Email	tua_1111@hotmail.com	- length : 1 – 40 characters - type : alphabet or number
Telephone no.	0807922691	- length : 10 characters - type : number

Precondition: The registered users are already logged-in in the system.
